GK104 Temperature/Humidity Sensor

Benefits

▲ Free-located temperature and humidity sensor
▲ Supports precise comfort control in rooms
▲ Wireless communication to room automation equipment
▲ Simple to use – simple to maintain
▲ True IPv6 IoT connectivity to all devices
▲ Low cost
▲ Ten-year warranty
▲ Powered by CR2450 lithium coin cell battery lasting 5 years
▲ Designed for end-of-life product recoverability

Models

▲ Black and white housing colors

The GK104 temperature and humidity sensor from AuVerte is part of a modern room automation solution. This sensor is used if the location or nature of the thermostat is unable to sense an accurate room temperature. Battery powered and utilizing wireless RF communication, the GK104 is simple to install and to maintain.
